

Identity Manager

The given tool for managing user accounts

Managing a growing number of users within different IT-systems is a challenge. Today there is a great need to make the administration of user accounts more efficient, while maintaining a high level of security.

The Nordic Edge™ Identity Manager allows you to easily and efficiently delegate the administration and, for instance, allow users themselves to handle their own user account.

The Nordic Edge™ Identity Manager is a powerful and secure tool for role based identity management that gives optimal control over the administration. The interface is user friendly and can easily be adapted according to needs. The administration takes place in a web interface, which makes it easy to distribute.

The Nordic Edge™ Identity Manager handles the identity information in existing IT-systems and applications. The introduction is uncomplicated and the need for training is minimal. The product uses existing infrastructure and resources.

Why use Identity Manager?

- Delegate the administration of user accounts
- Secure self-administration
- Role based authorization
- Manages identity information in existing IT-systems
- Adaptable user interface
- Easy to use
- Uses existing infrastructure and resources
