

One Time Password Server for Outlook Web Access

One-time passwords via SMS secure the Outlook Web Access login

More and more users are accessing Outlook through the Web Access. This increases the demand for secure login – simple authentication methods, user name and password are no longer sufficient. A strong authentication method is needed.

The Nordic Edge™ One Time Password Server gives Outlook Web Access the extra protection required for you to gain secure access to your e-mail. When logging in to Outlook Web Access, user name, password and a one-time password must be stated. The one-time password is sent via SMS to your cell phone.

The Nordic Edge™ One Time Password Server is an easy and powerful solution that is integrated into the existing IT-environment. The introduction is uncomplicated and the need for training is minimal. The solution uses existing infrastructure and resources, in other words, there are no expensive additional costs.

Why use One-Time Password?

- Increases login security
- Secure Outlook Web Access
- Easy to use
- One-time passwords is sent via SMS, e-mail or chat
- Uses existing infrastructure and resources
